PARTICIPATING SOCIETIES

The Mineralogical Society of America is committed to serving the community of mineralogists interested in mineralogy, crystallography, and geochemistry. Founded in 1919, the Society promotes, through education and advocacy, the understanding and application of mineralogy by industry, universities, and the public. Membership benefits include special subscription rates for American Mineralogist as well as other benefits. For information on Reviews in Mineralogy & Geochemistry series and Monographs, visit www.minasoc.org.

The Mineralogical Society of Great Britain and Ireland is an international society for all those working in mineralogy, crystallography, geochemistry, and related disciplines. The Society aims to advance the knowledge of mineralogy and its application to other subjects, including crystallography, geochemistry, petrology, and environmental science and economic geology. The Society furthers its aims through scientific meetings and the publication of scientific journals, books and monographs. The Society publishes Reviews in Mineralogy & Geochemistry and Clay Minerals. Students receive the first year of membership fee of charge. All members receive Elements.

The Mineralogical Association of Canada was incorporated in 1955 to promote and advance the knowledge of mineralogy and the related disciplines of crystallography, petrology, geochemistry, and environmental geology. Any person engaged or interested in these fields may become a member of the Association. Membership benefits include a subscription to the Canadian Mineralogist and access to the Association's Journal of the Canadian Mineralogist, a 20% discount on short course volumes and special publications, and admission to the registration fee for annual meetings.

The Clay Minerals Society (CMS) was the Clay Minerals Committee of the US National Academy of Sciences – National Research Council in 1952. In 1962, the CMS was incorporated with the primary purpose of stimulating research and disseminating information of clay science and technology. The CMS holds annual meetings, a clay field trips, and publishes Clays and Clay Minerals and the CMS Workshop Lectures series. Membership benefits include special subscription to the annual meeting, discounts on the CMS Workshop Lectures and Elements.

The Clay Mineral Society of America is an international organization founded in 1969 to serve professionals and amateurs interested in the study of clays and other extraterrestrial materials and their parent aerosols, comets, and planets. Members receive our journal, Meteoritics & Planetary Science, reduced rates for annual conferences and short courses, and support young researchers and early-career professionals. Through our medals and awards, we recognize excellence in meteoritics and allied fields.

The Meteorsociety is an international organization founded in 1953 for scientists, collectors, and educators to advance the study of meteorites and other extraterrestrial materials and their parent asteroids, comets, and planets. Members receive our journal, Meteoritics & Planetary Science, which covers the annual Meteoritical Bulletin and other extraterrestrial materials and their parent asteroids, comets, and planets. Members receive our journal, Meteoritics & Planetary Science, reduced rates for annual conferences and short courses, and support young researchers and early-career professionals. Through our medals and awards, we recognize excellence in meteoritics and allied fields.

The Japan Association of Mineralogical Sciences (JAMS) was established in 2007 by merging the Mineralogical Society of Japan, founded in 1955, and the Japanese Association of Mineralogists, Petrologists, and Economic Geologists, established in 1928. JAMS covers the wide field of mineral sciences, geochemistry, and economic geology. Membership benefits include receiving the Journal of the Japan Association of Mineralogical Sciences (JMSPS), the Gokoku-Kohatsu-Kagaku (GKK), and Elements.

The Swiss Society of Mineralogy and Petrology was founded in 1924 by professionals from academia and industry and amateurs to promote knowledge in the fields of mineralogy, petrology, and geochemistry and to disseminate it to the scientific and public communities. The Society organizes the annual Swiss Geoscience Meeting and publishes the Swiss Journal of Geosciences (SG). It is a worldwide organization of over 500 members and 200 Fellows, who include M. von Laue, G. von Hevesy, and others.

The Société Européenne de Minéralogie est une société académique et scientifique, fondée en 1933 pour promouvoir la recherche en minéralogie et en géochimie. Elle est affiliée à l’International Mineralogical Association (IMA) et à la Société Internationale de la Minéralogie (SIM).
