Cont’d from page 71

I hope these few case studies help illustrate some intriguing pitfalls in the analysis of bulk rock samples. Certainly, I think these examples put a spotlight on the power of a proficiency testing programme for revealing shortcomings in a laboratory’s methods. I would like to end by thanking Peter Webb (Milton Keynes, UK), who has been a long-term member of the GeoPT steering committee, Thomas Meisel (Leoben, Austria), who is President of the International Association of Geoanalysts, and Marcus Burnham (Sudbury, Canada) of the Ontario Geological Survey, all of whom provided invaluable assistance in preparing this toolkit contribution. For those geochemists eager to learn more about this 12-month position, please contact the search committee chair, Dr. Claudia Cenedese, by phone (508-289-2696) or e-mail (ccenedese@whoi.edu). To view more about WHOI and the position and to apply, please go online at http://jobs.whoi.edu under ‘Administrative Positions’. The review of applications will begin March 1, 2017.

Women and Minorities are strongly encouraged to apply. WHOI is sensitive to issues of confidentiality and dual career families and will work with applicants to address these. WHOI is an Affirmative Action/Equal Opportunity Employer.
