EAG MEMBERSHIP: TIME TO JOIN OR RENEW

As a new year is approaching, it is time to consider joining the European Association of Geochemistry or renewing your membership. The EAG has developed a comprehensive set of membership benefits at a very affordable price, one that can suit early career scientists or more advanced ones anywhere in the world.

- Member registration rates to **Goldschmidt** conferences
- Print and online issues of ***Geochemical Perspectives*** and ***Geochemical Perspectives Letters***
- Print and online issues of ***Elements***
- Reduced subscription rates to ***Chemical Geology*** and ***Geofluids***
- **Sponsorship of students** attending workshops and conferences in Europe
- Ambassador Program providing **early career scientists** who are based in Europe the support to attend conferences outside of Europe
- Sponsorship of member-led **workshops and conferences**
- Member rates for print publications of partner societies, including the Mineralogical Society of Great Britain and Ireland (MSGBI, aka MinSoc), the Geological Society of Italy (SGI), the Italian Society of Mineralogy and Petrology (SIMP), the French Quaternary Association (AFEQ), and for events organised by the International Association of GeoChemistry (IAGC) and the International Society for Environmental Biogeochemistry (ISEB).

Membership Rates

| | | | |
|-----------------|----------|----------------------|-----------|
| Student 1 year | 15 Euros | Professional 1 year | 25 Euros |
| Student 3 years | 35 Euros | Professional 5 years | 100 Euros |

WHY ARE THEY EAG MEMBERS?

Each member, at each stage of their career, has various reasons for joining our society and supporting its initiatives. We asked some of our new and long-time members why they decided to become EAG members.

"I'm an EAG member because it has a lot of advantages, especially for PhD students like me. For instance, we gain access to high-quality scientific publications not only online but also in physical format, which I really love. Also, it offers multiple fellowships and grants to attend conferences, short courses, etc. And on top of it, the membership is completely affordable."

Maria Isabel Varas-Reus, PhD student
University of Granada, Spain

"EAG provides me with outstanding open-access publications and is a no-nonsense low-overhead organisation truly serving the geochemical community."

Jack Middelburg, Professor
Utrecht University, Netherlands

"EAG helps me to get the latest news in the geochemistry world, as well as funding for participating in related conferences."

Reza Gooya, PhD student
University of Copenhagen, Denmark

"The EAG is a society that feels very personal to me, and I always enjoy meeting other members at Goldschmidt. It is a very active society, which has interesting articles about all aspects of biogeochemistry."

Marie Muehe, Postdoctoral Research Fellow
Stanford University, USA

"I am an EAG member because of the important work the association does to support geochemistry in Europe and throughout the world. I particularly appreciate the steps taken to promote the discipline at the EGU General Assembly, the Goldschmidt Conference and at other meetings, and its publication of influential open-access journals like *Geochemical Perspectives*, *Geochemical Perspective Letters* and *Elements*."

Nicholas Arndt, Professor
Insitut des Sciences de la Terre, France

"I am an EAG member to widen and engage with the number of peers in my field. The EAG is akin to a social media platform for scientists, while the development of not-for-profit, peer reviewed journals is an innovative step to solving the current issues with the publication of scientific work."

Morgan Jones, Researcher
University of Oslo, Norway

"As many people, I first became a member through registration at Goldschmidt, but then renewed my membership as I appreciated the benefits such as *Elements* and more recently *Geochemical Perspectives* and *Geochemical Perspectives Letters*. Now being an EAG councillor, I am proud that EAG promotes open-access high-quality journals and helps students to attend conferences."

Vinciane Debaille, Researcher
University of Brussels, Belgium

"I'm an EAG member because the student fees are really low, and it gives you access to benefits such as the lower registration fees and the sponsorship programs. Although we have institutional subscription to *Geochemical Perspectives*, *Geochemical Perspectives Letters* and *Elements*, it's always nice to have them in print as well."

Michael Anenburg, PhD Student
Australian National University, Australia

"I am a member because EAG is an association of high academic value, with respect to the conferences and publications."

Rosa Maria, Professor
Universidad Nacional Autonoma de Mexico

"I am an EAG member because it allows me to network with other geochemists around the world and to support essential activities like meetings and publication with my voice being heard."

Francis Albarède, Professor
École normale supérieure de Lyon, France

"I greatly enjoy the EAG membership because I get regular updates on new discoveries in the world of geochemistry, about upcoming meetings and current job opportunities, as well as access to fantastic blogs about geochemistry research life. Aside from that, I get a free copy of *Elements* and *Geochemical Perspectives* delivered to my doorstep which make for excellent reading on a wide variety of geochemistry topics. Last but not least, for the little membership fee, I get a substantial

reduction in registration fee for the yearly Goldschmidt Conference, which is just a fantastic conference."

Dominique Tobler, Associate Professor
University of Copenhagen, Denmark

"I need to be exposed to the new updates of the science and get inspired from experts. That is the main reason for being an EAG member."

Sudeera Wicramaratne, PhD student
University of Peradeniya, Sri Lanka

2017 EAG AWARDS: THERE IS STILL TIME TO SEND YOUR NOMINATION

Recognition of scientific excellence at all stages of one's career is crucial and nominating deserving colleagues ensures that recognition.

- **EAG/GS Geochemical Fellows:** honours outstanding scientists who have made major contributions to geochemistry. Nomination deadline: 31 October.
- **Urey Award:** recognizes scientists who have made outstanding contributions advancing geochemistry over a career. Nomination deadline: 15 November.
- **Houtermans Award:** recognizes scientists within 12 years from the start of PhD for exceptional contributions to geochemistry. Nomination deadline: 15 November.
- **Science Innovation Lowenstam Award:** recognizes mid-career scientists for their innovative contributions to biogeochemistry. Nomination deadline: 15 December.

Details at www.eag.eu.com/awards/nomination.
