

Elements

An International Magazine of Mineralogy, Geochemistry, and Petrology

Rock specimen (15 cm across) from Mt. St. Hilaire, Quebec, Canada. Under ultraviolet illumination, sodalite emits orange, albite pink-red, presumable gaidonnayite green, and pectolite blue-purple. IMAGES BY GLENN WAYCHUNAS.

Elements is published jointly by the Mineralogical Society of America, Mineralogical Society of the UK and Ireland, Mineralogical Association of Canada, Geochemical Society, The Clay Minerals Society, European Association of Geochemistry, International Association of Geochemistry, Société Française de Minéralogie et de Cristallographie, Association of Applied Geochemists, Deutsche Mineralogische Gesellschaft, Società Italiana di Mineralogia e Petrologia, International Association of Geoanalysts, Polskie Towarzystwo Mineralogiczne (Mineralogical Society of Poland), Sociedad Española de Mineralogía, Swiss Geological Society, Meteoritical Society, Japan Association of Mineralogical Sciences, and International Association on the Genesis of Ore Deposits. The magazine is provided as a benefit to members of these societies.

Elements is published six times a year. Individuals are encouraged to join any one of the participating societies to receive *Elements*. Institutional subscribers to either of the following journals—*American Mineralogist* and *Canadian Journal of Mineralogy and Petrology*—also receive one copy of *Elements* as part of their subscription. Institutional subscriptions are available for US\$185 (US\$200 non-US addresses) per year in 2024. Contact the Executive Editor (editor@elementsmagazine.org) for information. Behind and Beyond Luminescence Imaging

Guest Editors: **Lutz Nasdala, Emmanuel Fritsch, and Jens Götze**

287

Luminescence: The “Cold Glow” of Minerals

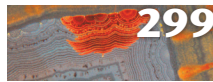

Lutz Nasdala and Emmanuel Fritsch

293

Activators in Minerals and the Role of Electronic Defects

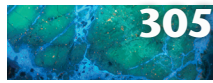

Glenn Waychunas and Ulf Kempe

299

Luminescence Images: What is it That You See?

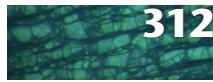

Jens Götze, Colin M. MacRae, and Lutz Nasdala

305

Luminescence Applications in Petrology

Adrian A. Finch, Magdalena Dumańska-Słowik, Laura González-Acebrón, and Hans-Peter Schertl

312

Analysing the Luminescence of Gems

Thomas Hainschwang, Emmanuel Fritsch, Eloïse Gaillou, and Andy Shen

318

Luminescence Applications in Ore Geology, Mining, and Industry

Michael Gaft, Peter K.M. Megaw, Lex Lambeck, and Samuel Cantor
